

The University of Applied Sciences in St. Pölten, Austria is both locally positioned and globally oriented with a focus on offering best facilities for quality education in the fields of Media, Informatics, Traffic, Health and Social Sciences. The interdisciplinary environment enables novel collaboration at the interface between teaching and research, facilitating solutions for both the economy and society. About 2,900 students are receiving a practice-oriented academic education in 17 undergraduate and postgraduate courses and numerous opportunities to obtain further training.

The following position is vacant at the [Institute of Creative Media/Technologies](#).

Head of Research Group Media Creation (m/f)

(40 hours/week)

The [research group](#) carries out interdisciplinary applied research on audio-visual media environments and examines multiple aspects of production processes on a wide range of media, including film, television, internet and mobile. The group's scope extends to an active exploration of multi-channel experiences and narratives for exhibitions, museums as well as events in public spaces and is actively working on adaptable concepts for distribution, archiving and commercial exploitation of digital contents.

Your responsibilities

- Leading and developing the research group Media Creation
- Applying for research grants; leading and conducting research projects
- Developing innovative methods of design, development, and production for video, film, TV, sound, media installations and digital platforms by applying new digital media technologies (preferably virtual & augmented reality, postpro/VFX, 360 degrees audio/video, HDR)
- Publication of research results in highly-ranked international academic publication channels
- Teaching in courses of the department (to a limited extent)

Your qualifications

- PhD or equivalent qualification (relevant publication track record)
- Multi-year working experience or established training in media technology or audio-visual media
- Experience as (research-) project leader or in project management
- Knowledge and experience in media technology, media design and/or media production
- Experience in the acquisition of third-party funds (national/international research funding and contract research)
- Teaching experience is appreciated
- Excellent contacts in relevant networks/application areas on a national or European level
- Excellent oral and written English skills

We offer

A long-term position (40 hours/week) in a dynamic environment of an ambitious and achievement-oriented University of Applied Sciences. The minimum gross salary for this position is € 4,000/month, overpayment is possible according to the internal structure of salary. The research group Media Creation explicitly invites qualified women to apply.

Deadline for applications: 2017/06/15

You may apply directly on our [website](#) (application form in German language).
